REASONS FOR ALLOWANCE

1. In the After Final Response of Dec. 20, 2004, applicant has provided arguments and evidence overcoming the outstanding rejections. Specifically, (1) applicant has overcome the outstanding 35 USC 112 rejection of claims 20-39 as the meaning of the term "substantially" (independent claims 20 and 30). Applicant has indicated that it would be understood to mean "to a great or significant extent", "for the most part; essentially"; as shown by the cited dictionary definition. This definition corresponds to the movement direction shown in figures 2 and 3, and thus is supported by the specification as originally filed. (2) Applicant has further overcome the 35 USC 103 rejection of the claims. As "substantially" is now understood to mean "to a great or significant extent", "for the most part; essentially", the reference to Laapotti (US 5951821) is no longer understood to show "substantial" movement of the support roll in the web direction (as shown in figures 5 and 6), as the reference only shows a small percentage of the movement being in the web direction.

2. The following is an examiner's statement of reasons for allowance: the closest prior art is to Laapotti (US 6372090) and Laapotti (US 5951821) (hereinafter Laapotti '821). As discussed in the Final Rejection of October 15, 2004, the references, in combination, teach or suggest a method and apparatus for the application of a viscid medium coating to at least one side of a pre-dried material web moving in a web direction, routing the web through a press nip and supporting the web with an extensible surface, which can be a belt, substantially without free draw after the routing step, with the extensible support surface being extensible in the web direction.

Art Unit: 1762

The extensible support surface is partially supported by a roll. However, the references do not teach or suggest the roll being laterally movable substantially in the web direction as is now claimed. As “substantially” is now understood to mean “to a great or significant extent”, “for the most part; essentially” (as discussed in paragraph 1 above), the reference to Laapotti ‘821 is no longer understood to show “substantial” movement of the support roll in the web direction (as shown in figures 5 and 6), as the reference only shows a small percentage of the movement being in the web direction.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Katherine A. Bareford whose telephone number is (571) 272-1413. The examiner can normally be reached on M-F(6:30-4:00) with the First Friday Off.
